DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to methods comprising measuring levels of ESBPIII.

Group II, claim(s) 7-10, drawn to methods of imaging or treating comprising administering an antibody that binds ESBPIII.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each of the invention groups uses different products. Therefore, no special technical feature links the invention groups. The technical feature of group I is an ESBPIII polypeptide. The technical feature of group II is an antibody that binds to ESBPIII.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
